

**Dr. Ana Lilia Sandoval**

**International Regulatory Analyst, Latin America Office**

**FDA**

Dr. Sandoval is a Bacteriological and Parasitological Chemist from the National School of Biological Sciences of the National Polytechnic Institute. She holds a master's degree in Chemobiological Sciences and a PhD in Biomedicine and Molecular Biotechnology from the National Polytechnic Institute. Since 2010, she has been working as an Analyst in International Regulatory Affairs at the Latin American Office of the FDA in Mexico. She worked for 3 years with the USDA-APHIS in Mexico City where she was part of several projects related to the diagnosis of infectious diseases mainly zoonotic such as rabies, brucellosis, influenza, among others. Prior to working at APHIS she worked as an assistant professor at the School of Medicine of the NPI. During 2002-2003 she worked as a Research Technician in the Microbiology and Immunology laboratory at the University of Arizona. She also worked as an electrodiagnostic technician in the Serum Production Department of the Laboratorios de Biológicos y Reactivos de México, BIRMEX, S.A. de C.V. Her main interest is in public health and the prevention of human health risks.
