

Clarisa Molina

General Manager

SerKa Solutions

Clarisa Molina, is a consultant in Safety and Quality Systems for the fresh produce industry. With a degree in Industrial Engineering, specializing in Agribusiness and a Master's in Quality and Productivity Systems, she has a strong orientation towards process improvement and personnel training.

Clarisa has been involved in agricultural safety issues in the United States and Latin America for the past 23 years, developing certification schemes, helping producers to establish and certify their Good Agricultural Practices, Good Manufacturing Practices, HACCP and other programs, in order to meet their customers' requirements, as well as helping buyers in the United States to design their supplier approval systems and supply chain databases, useful in their purchasing decisions.

Her professional experience includes: Auditor and Director of Quality Assurance at PrimusLabs for 9 years; Technical Director at Azzule Systems, responsible for the PrimusGFS scheme, for 3 years; Advisor to the group that manages leafy greens producers in California (LGMA), during 2012; Advisor to the Inspections Division of the California Department of Food and Agriculture (CDFA), during 2013; and representative in the United States of the Mexico Calidad Suprema program, during 2014; among many other activities.

Since 2013, she is the owner of the consulting company Serka Solutions, LLC, based in San Diego, California, providing service to certification schemes, certifying bodies, producers, and importers of fresh produce. Her consulting and training activities cover numerous Food Safety topics, including PrimusGFS certification, organic certification, FDA FSMA (Food Safety Modernization Act) regulations, as well as International HACCP Alliance.
